

Country Day of Jupiter

5937 Roebuck Rd • Jupiter, FL 33458

Country Day of Jupiter is a family-owned preschool, dedicated to helping young children develop social skills in a loving and secure environment. We believe each child is a unique individual and should be free to mature intellectually, physically, emotionally and socially to their fullest potential. The combination of these elements provides our children with a positive experience that will enhance their educational years ahead.

The learning curriculum changes each year to specifically accommodate the social and educational needs of each age group. All of our programs are designed to provide a positive experience to build each child's self-esteem - one of the most valuable tools children can acquire during the first five years of life.

Country Day of Jupiter offers a loving and exciting environment for:

- Infants (3-12 months)
- Toddlers (12-24 months)
- Two year olds
- Three year olds
- Pre-Kindergarten (4 year olds)
- Afterschool program
- Summer Camp for all age groups

Our creative, fun-filled learning activities, together with our experienced, professional and caring teachers, provide the ideal environment for your child. We hire only highly qualified preschool teachers, and encourage their educational and professional development through our scholarship program.

Our campus is modern, cheery and colorful both inside the spacious self-contained classrooms and outside on our age-appropriate playgrounds.

High Reach Curriculum: Constantly in motion, infants, ones and two-year-olds are determined to learn on their own. This curriculum provides a rich learning environment that helps them expand their vocabularies, find appropriate ways to express creativity, and safely discover the world around them. They are developing many new skills in their quest for independence - walking, talking/listening, and discovering who they are and what they can do. This curriculum encourages their sense of discovery while building vocabulary, encouraging imagination, and personalizing learning.

Our **Toddler Program** is aimed at providing a warm, loving and safe environment filled with learning activities that enhance the development of your child. We provide opportunities for the children to explore, experiment and improve their self-help skills. Sensory games, picture games, songs, nursery rhymes and puppet play are a few examples of the activities planned.

Our **Two-Year-Old Program** also encourages language development and exposes the children to basic concepts and skills. The daily schedule includes age-appropriate lesson plans, art projects, development of fine/gross motor skills, music and movement exercises and organized inside / outside activities.

The A Beka Curriculum and materials work together to give a thorough, enjoyable, and highly teachable phonics approach to reading. Instruction is presented in six easy steps: short vowels, consonants, blends, one-vowel words, long vowels and the two-vowel rule, and special phonics sounds.

Our **Three-Year-Old Program** is designed to encourage the children to explore a variety of basic concepts and skills. The children will learn names, sounds, and pictures of all the letters of the alphabet. They will learn how to count to 50 and recognize number 1-15. The curriculum includes shape and color recognition, opposites and positional concepts. Fun-filled, colorful enrichment sheets are used to reinforce discoveries the children make and help them share the new knowledge with their parents. Poems, nursery rhymes, stories, and finger plays are integrated to make the learning process more meaningful and a fun experience for the children. In addition, the "3's" will enjoy field trips to various locations in Jupiter.

The children in our **Pre-Kindergarten Program** will study phonics, math concepts, letter/number recognition, and science exploration to name a few. Concepts and skills are integrated to make the learning process more meaningful for the children. Arts and crafts, music and movement, educational computer games, and physical education are also an important part of the program. They enjoy monthly field trips and special visitors that coincide with the monthly themes being discussed. We also accept VPK Certificates!

Aftercare (ages 5-11): When the after school children arrive on our buses from the local elementary schools every afternoon, they can participate in the many fun-filled activities we plan, including athletic games, arts and crafts projects, music and movement exercises and much more! We allow computer access on a limited basis for educational use and recreational fun. Quiet time is set aside for homework and reading.
